

## Overview

Seasons and nature provide a rich tapestry of visual opportunities for photographers, each season offering unique colors, textures, and moods. This assignment focuses on capturing the essence of each season through specific techniques and thoughtful compositions, enhancing your ability to document nature's beauty throughout the year.

## Learning Objectives

- Understand the unique characteristics of each season and how they affect photographic compositions.
- Develop technical skills to effectively use camera settings in different lighting conditions.
- Cultivate a creative approach to seasonal photography, focusing on mood and atmosphere.

## Before You Shoot

- Research seasonal changes in your area to identify the best locations and times for shooting.
- Prepare your camera gear, ensuring you have appropriate lenses for close-up and wide-angle shots.
- Check weather conditions to plan for optimal lighting and atmospheric effects.
- Create a shot list focusing on specific seasonal elements you wish to capture.
- Charge your batteries and format memory cards to ensure you're ready for the day.

## Assignment Tasks

1. Photograph a blooming flower in spring at f/2.8, 1/125s, ISO 200 in aperture priority mode to capture its delicate details.
2. Capture a vibrant summer sunset at f/8, 1/60s, ISO 100 using manual mode to highlight the colors of the sky.
3. Shoot a forest scene in autumn at f/5.6, 1/250s, ISO 400 in aperture priority mode, focusing on the colorful leaves.
4. Document a winter landscape at f/11, 1/500s, ISO 100 using manual mode to capture sharp details across the scene.
5. Create a macro shot of frost on a leaf in winter at f/4, 1/60s, ISO 400 in manual mode to highlight intricate textures.
6. Photograph a spring meadow at f/8, 1/125s, ISO 200 in aperture priority mode to capture the vibrancy of new life.

## Stretch Tasks

- Create a time-lapse series documenting the transition from winter to spring, capturing the gradual change in landscape over weeks.
- Develop a photo essay that tells the story of a specific location through all four seasons, focusing on the changes in flora and fauna.

## DO / DON'T

DO	DON'T
<ul style="list-style-type: none"><li>✓ Do scout locations in advance to find the best compositions for each season.</li><li>✓ Do experiment with different perspectives and angles to create unique images.</li><li>✓ Do utilize natural light to enhance the mood of your photographs.</li><li>✓ Do take notes on camera settings and conditions for future reference.</li><li>✓ Do practice patience and wait for the right moment to capture seasonal changes.</li></ul>	<ul style="list-style-type: none"><li>✗ Don't rely solely on auto mode; learn to use manual or priority modes for better control.</li><li>✗ Don't forget to check your histogram to ensure proper exposure.</li><li>✗ Don't ignore the weather; clouds can create dramatic effects but also require adjustments in settings.</li><li>✗ Don't rush your shots; take time to compose and consider your framing.</li><li>✗ Don't overlook the smaller details; often, the beauty of a season lies in its subtleties.</li></ul>

## Reflection Questions

- What unique challenges did you face while photographing each season?
- How did your choice of camera settings affect the final images?
- In what ways did the changing light influence your compositions?
- What techniques did you find most effective for capturing the essence of each season?
- How can you apply what you've learned about seasonal photography to future projects?

## Technical & Creative Focus

### Technical:

- Utilize a shallow depth of field (f/2.8, 1/125s, ISO 200) in aperture priority mode to isolate flowers during spring.
- Set your camera to manual mode with a shutter speed of 1/500s, aperture f/11, and ISO 100 to capture the vibrant colors of summer landscapes.
- Use a polarizing filter to enhance autumn foliage colors while shooting at f/4, 1/250s, ISO 400.
- In winter, experiment with long exposures (f/8, 15s, ISO 100) to create dreamy effects in snowy scenes.
- Adjust white balance settings to 'Cloudy' to warm up the tones in your autumn photographs.

### Creative:

- Capture the interplay of light and shadow during the golden hour to enhance the mood of your seasonal images.
- Incorporate leading lines in your compositions to draw the viewer's eye through the scene.
- Experiment with reflections in water during autumn to add depth and interest to your shots.
- Create a series of images that showcase the transition between seasons, focusing on changes in color and texture.
- Utilize negative space in winter photography to emphasize the stark beauty of a snow-covered landscape.
